- Location: Bengaluru, India

PROFESSIONAL SUMMARY

Creative systems engineer building production-grade backend infrastructure, AI tooling, developer tools, and full-stack applications. From event platforms serving 2000+ users to intelligent storage engines and multi-agent AI systems — I build things that work at scale. Comfortable across the stack — Python, Go, TypeScript, React, FastAPI, and more. Co-founder at ParaPixel DigiServices, ranked top 50 globally in Codingame Clash of Code.

EDUCATION

- B.Sc. Computer Science — Scaler School of Technology (Class of '29), GPA 9.29
- Completed first year, entering second year
- Completed High School (CBSE) — Delhi, India
- Smart Delhi Hackathon — Winner
- Blocktrain Hackathon — 3rd Place
- Clash of Code — Top 50 International Rank

TECHNICAL SKILLS

- Programming Languages:
Python, JavaScript/TypeScript, Go, C++, Java, SQL, Rust (exploring)
- Frameworks & Libraries:
React, Next.js, FastAPI, Flask, Django, Express, React Native, Flutter, TailwindCSS, Framer Motion
- Databases & Storage:
PostgreSQL, MongoDB, Redis, Supabase, BadgerDB, SQLite
- AI / ML:
PyTorch, LangChain, Gemini API, Claude API, OpenAI, computer vision, multi-agent systems, LLM tooling
- Web3 & Security:
GitGuild (decentralized prediction markets), XeroDay-APISniffer (API security), steganography
- Tools & Technologies:
Git, GitHub, Docker, Docker Compose, Linux (Arch Linux), Bash scripting, CI/CD, JWT, OAuth, REST APIs, WebSockets

EXPERIENCE

- Co-founder & Lead Developer | ParaPixel DigiServices
- 2024 — Present
Built client production systems: tournament management (IndianOil Servo Surjit Hockey Tournament), e-commerce (Sandhya Foods with Razorpay + Supabase)
Owned architecture, deployment, and maintenance across client projects
- Independent Software Developer | Full-Stack & Systems
- 2021 — Present
Built and deployed production-grade event management platform powering 2000+ users (Ascent Dashboard)

Developed intelligent multi-modal storage engine in Go with smart SQL/NoSQL routing and multi-level caching (3.6M ops/sec)

Active open-source contributor with 30+ public repositories

Comfortable across Python, Go, TypeScript, Linux, Docker, and full-stack development

■■■ Technical Lead | Ascent TechFest (Scaler School of Technology)

■ 2025 — 2026

Core technical team member leading the tech fest's technical operations

■ Community Leader | SST Student Community

■ 2025 — Present

Administrator for an 800+ member student community

PROJECTS

■ Ascent Dashboard

Central platform for 2000+ hackathon participants — event management, QR validation, gamification, real-time leaderboards, AI photo gallery

Tech: FastAPI, React 18, PostgreSQL, Redis, Docker, JWT

GitHub: [Ascent Dashboard](https://github.com/Muneer320/dashboard) | Live: ascent.scaler.com

■ RhinoBox

Intelligent multi-modal storage engine — auto-categorizes and routes data to optimal DB (SQL vs NoSQL)

Tech: Go, PostgreSQL, MongoDB, BadgerDB, Chi Router, Docker

GitHub: [RhinoBox](https://github.com/Muneer320/RhinoBox)

■ BOOP — Book Of Organized Puzzles

Automated puzzle book generator — CLI + web app for creating categorized word search puzzle books

Tech: Python, FastAPI, React, ReportLab, Docker (10+ stars)

GitHub: [BOOP](https://github.com/Muneer320/BOOP) | Live: boop-web.vercel.app

■ codelines

Blazing-fast parallel Lines of Code counter with beautiful terminal output

Tech: Python, concurrent processing, CLI

GitHub: [codelines](https://github.com/Muneer320/codelines)

■■■ XeroDay-APISniffer

Modular toolkit for scanning publicly available GitHub APIs for security insights

Tech: Python, GitHub API

GitHub: [XeroDay-APISniffer](https://github.com/Muneer320/XeroDay-APISniffer)

■ Surjit Hockey Tournament

Full-stack tournament management for IndianOil Servo Surjit Hockey Tournament (Grade-I)

Tech: FastAPI, React 19, MySQL, Tailwind CSS 4, Framer Motion

GitHub: [Surjit-Hockey](https://github.com/ParaPixel-DigiServices/surjit-hockey) | Live: surjit-hockey.vercel.app

■ Sandhya Foods

E-commerce platform with Razorpay payments, WhatsApp order notifications, Supabase backend

Tech: Next.js 16, React 19, TypeScript, Supabase, Razorpay, TanStack Query

GitHub: [Sandhya-Foods](https://github.com/ParaPixel-DigiServices/sandhya-foods) | Live: sandhya-foods.vercel.app

■ Finity

Gamified financial literacy platform with AI coaching, paper trading, and personalized micro-courses

Tech: React 18, FastAPI, OpenAI API, Gemini AI, Tailwind CSS

GitHub: [Finity](https://github.com/Muneer320/finity) | Live: finity-rust.vercel.app

■ exHacker

From idea to production-ready project blueprint in under 30 seconds — multi-agent AI hackathon copilot

Tech: Python, multi-agent AI orchestration

GitHub: [exHacker](https://github.com/Muneer320/exHacker)

■ teams-clone

Realistic Microsoft Teams clone built as a reinforcement learning environment

Tech: JavaScript, RL environment design

GitHub: [teams-clone](https://github.com/Muneer320/teams-clone)

■■■ GitGuild

Decentralized prediction markets for GitHub pull requests — trade tokens on PR outcomes

Tech: TypeScript, Web3 concepts

GitHub: [GitGuild](https://github.com/Muneer320/GitGuild)

■ LNX

The Worst Programming Language Ever — a deliberately terrible language, built for fun

Tech: Python, language design

GitHub: [LNX](https://github.com/Muneer320/LNX)

■■■ Abstracta2.0

Reimagines images as abstract artwork using evolving shapes and smart rendering

Tech: Python, computer vision, generative art

GitHub: [Abstracta2.0](https://github.com/Muneer320/Abstracta2.0)

■ MessageInPicture

Steganography — hide and extract messages via image binary manipulation

Tech: Python, image processing

GitHub: [MessageInPicture](https://github.com/Muneer320/MessageInPicture)

■ ChemPath

Student-friendly molecular pathway finder — like Google Maps for chemistry

Tech: Python (backend), TypeScript React (frontend)

GitHub: [ChemPath](https://github.com/Muneer320/ChemPath)

■ receipt-reader

Receipt parser: photo → LLM → structured data → correct → save

Tech: TypeScript, LLM pipeline

GitHub: [receipt-reader](https://github.com/Muneer320/receipt-reader)

■ Rinse

Swipe to clean your gallery — a beautiful, privacy-first photo cleanup app

Tech: TypeScript, mobile

GitHub: [Rinse](https://github.com/Muneer320/Rinse)

■ SST Lounge Bot

Feature-rich Discord bot for SST Batch '29 — contest tracking, auto role management, self-updating

Tech: Python, discord.py, SQLite, clist.by API

GitHub: [SST-Lounge-Bot](https://github.com/Muneer320/SST-Lounge-Bot)

■ CPStats API

REST API aggregating competitive programming ratings from LeetCode, Codeforces, CodeChef, AtCoder

Tech: Python, FastAPI, Docker, Pydantic

GitHub: [CPStats-API](https://github.com/Muneer320/CPStats-API) | Live:

muneer320-cpstats-api.hf.space

■ LEAP — Linked Enigmas And Puzzles

Linked Sudoku puzzle book generator — each puzzle's solution unlocks the next

Tech: Python, ReportLab, Pillow

GitHub: [LEAP](https://github.com/Muneer320/LEAP)

■ RehabFlow AI

AI-powered rehabilitation planning for MSK conditions using MedGemma + BLIP clinical image analysis

Tech: Next.js 15, FastAPI, Supabase, Redis, Modal, 10+ languages

GitHub: [RehabFlow-AI](https://github.com/AmoghRao21/RehabFlow_AI) | Live: rehab-flow-ai.vercel.app

■ Oratio — AI Debate Arena

Voice-enabled AI debate platform with AI judge using LCR scoring model

Tech: FastAPI, React 18, Gemini AI, WebSockets, Docker

GitHub: [Oratio](https://github.com/Muneer320/oratio)

■ Vector — NSET Exam Prep

AI-powered NSET exam preparation platform with mock tests, AI interviews, personalized learning

Tech: React 19, Vite, Gemini AI, Three.js, Express.js, MongoDB

GitHub: [Vector](https://github.com/AmoghRao21/vector) | Live: vector-lovat.vercel.app

ACHIEVEMENTS

■ Smart Delhi Hackathon — Winner

■ Blocktrain Hackathon — 3rd Place

■ ProdX (NAVERA '26) — Top 7 of 350+ teams (built iffy.ai)

■ Meta PyTorch OpenEnv Hackathon — crew member (2000+ builders)

■ Clash of Code (Codingame) — Top 50 International Rank

■ GPA 9.29 — Scaler School of Technology

CERTIFICATIONS

■ Python Full Course (Beginner to Advanced) — GeeksforGeeks

■ AWS APAC Solutions Architecture Job Simulation — Forage

■ Python (Basic) — HackerRank

■ Data Visualisation Job Simulation — Tata Group (Forage)
